3D Hands ONLY Plaster sculptures \$550

3D Feet ONLY Plaster sculptures - \$550

Full package of ink prints/scans, silicone moulds, Plaster
Sculptures of Hand and Feet - \$825

Scans / Ink Prints

Suitable for full term & pre term baby

We use a high quality portable hand scanner to capture every little detail of bubs hands and feet. Digital images of the prints will be sent directly to your email

If you prefer ink prints on paper, please let us know prior to the appointment.

Orders can be placed for the prints to be engraved on rings, bangles, pendants and other keepsakes at any time you are ready to reach out.

Silicone moulds of hands and feet

Suitable for full term & pre term baby

We use a very gentle technique capturing a 3d impression of the palm side of the hands and soles of the feet in high quality silicone.

They are beautiful keepsakes as they are. They can also be used to create multiple plaster casts yourself at home, or you can order them through us.

Please let us know prior to the appointment if you would like the impressions to be left for you to collect or if you would like us to keep them in our care to create the plaster casts.

3D Hands and Feet Plaster Sculptures

Suitable for full term new born - 2
years old

Hands and feet are moulded and cast in plaster stone on the day we visit. These moulds are only able to be used once, so if multiple sets are wanted, we need to know prior to visiting.

The plaster sculptures are refined and painted white at our studio. Custom finishes may be requested.

They are carefully packaged loose in a box and can be collected from our workshop in Chirnside Park once they are finished.
